Walnut Creek, California 94506

Dear Mr. Engelken:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station, Units 2 and 3

By letter to your office dated January 28, 1981 we transmitted an interim report regarding a condition which we consider to be reportable in accordance with 10CFR50.55(e). The condition involves compliance of certain bolting materials with the ASME Boiler and Pressure Vessel Code, Section III, NCA-3867.4(e).

In the transmittal letter we stated that a final report would be submitted by March 16, 1981. We now find that the investigation and resolution of this condition will take longer than expected, due to time required to obtain responses from suppliers of ASME Code equipment. Submittal of the final report is now scheduled for May 18, 1981.

If you have any questions regarding the current status of the investigation, we would be pleased to discuss them with you at your convenience.

Very truly yours,

A handwritten signature in dark ink, appearing to be 'V. Stello', with a long horizontal line extending to the right.

cc: Victor Stello (NRC, Director I&E)
R. J. Pate (NRC, San Onofre Units 2 and 3)
