October 9, 1981

Director, Office of Nuclear Reactor Regulation
Attention: Mr. Harold R. Denton, Director
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

As we discussed yesterday, Southern California Edison has received a copy of the October 1, 1981, letter to you from Ms. Mary L. Hudson, Staff Counsel, California Coastal Commission (CCC). I have asked that Mr. Charles Kocher, Assistant General Counsel for the Company, respond to Mr. Chandler of the NRC Office of the Executive Legal Director. A copy of Mr. Kocher's response is enclosed for your information.

As discussed in the enclosed letter, Ms. Hudson is incorrect in asserting that our application for operating licenses for San Onofre Units 2 and 3 is subject to the "consistency certification" provisions of the Federal Coastal Zone Management Act. The Federal Act applies only to applications for federal licenses filed subsequent to final approval of a state's coastal zone management program by the National Oceanic and Atmospheric Administration (NOAA). The California Coastal Zone Management Program was approved by NOAA on November 7, 1977, nearly eight months following the filing of our application for operating licenses with the NRC (March 23, 1977).

I am confident that you will recognize that the matters raised by Ms. Hudson do not bear on and therefore should not affect issuance of low-power or full-power licenses for San Onofre Units 2 and 3.

Sincerely,

Robert Dietch
