Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

SCE's letter dated April 16, 1981 transmitted Revision 1 to the Environmental Qualification (EQ) Report for San Onofre Units 2 and 3 in accordance with the requirements of NUREG-0588. Subsequently, the NRC Environmental Qualification Branch (EQB) conducted an audit of the applicant's environmental qualification program on May 11 - 15, 1981.

Enclosed, please find sixty-three (63) copies of Revision 2 to the Environmental Qualification Report. Revision 2 to the Environmental Qualification report adequately addresses the NRC EQB concerns resulting from the May 11 - 15, 1981 NRC audit which are delineated in Supplement No. 3 to the San Onofre Units 2 and 3 Safety Evaluation Report dated September, 1981. Consistent with a request made by Mr. N. B. Le of NRC EQB during a discussion on November 3, 1981, Revision 2 also specifically identifies sections of the report which have been updated since Revision 1 to resolve all the NRC EQB concerns.

If you have any questions or comments, please contact me.

Very truly yours,

KP Baskin
