Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

In our response to NUREG-0737, Item II.B.1, SCE committed to provide procedures for reactor coolant gas vent system operation by January 1, 1982. However, in the NRC/SCE management meeting of December 3, 1981, statements were made indicating that no further effort should be applied to this issue until after detailed studies regarding operating constraints are completed by the NRC at some future date.

Consequently, SCE withdraws the above commitment and agrees to provide procedures for system operation in a reasonable time frame after operating restrictions are fully defined by NRC.

If there are any comments or questions regarding the above, please contact me.

Very truly yours,

KP Baskin
