Subject: Docket Nos. 50-361/50-362  
Monthly Operating Reports for March 1990  
San Onofre Nuclear Generating Station, Units 2 and 3

This letter provides the Monthly Operating Reports required by Section 6.9.1.10 of Appendix A, Technical Specifications (TS) to Facility Operating Licenses NPF-10 and NPF-15 for San Onofre Nuclear Generating Station, Units 2 and 3, respectively.

The reports cover each Unit's routine operating statistics and shutdown experience; all challenges to the safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and any major changes to the radioactive waste treatment systems. All covered activities are reported monthly, except for ODCM changes which requires reporting within 90 days from the time the changes were made effective.

On February 1, 1990, a change, associated with Revision 20A, to the Units 2 and 3 ODCM was made effective. ODCM pages affected by the change are included in this month's report. There were no challenges to the safety valves or major changes to the Units 2 and 3 radioactive waste treatment systems during the reporting period.

If you require additional information, please let me know.

Very truly yours,

Enclosures
