Subject: Docket Nos. 50-361 and 50-362
Monthly Operating Reports for February 1992
San Onofre Nuclear Generating Station, Units 2 and 3

Technical Specification 6.9.1.10 to Facility Operating Licenses NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, requires SCE provide a Monthly Operating Report for each Unit, which includes: routine operating statistics and shutdown experience; all challenges to safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and any major changes to the radioactive waste treatment system. All covered activities are reported monthly, except for ODCM changes, which are reported within 90 days from the time the changes were made effective.

This letter transmits the February 1992 Monthly Operating Reports for Units 2 and 3, respectively. There were no challenges to safety valves and no major changes to the Units 2 and 3 radioactive waste treatment systems during the reporting period. Revision 25 to the ODCM which was issued on February 28, 1992, is provided in Attachment A.

Attachment B provides a revised Unit 3 "Unit Shutdowns and Power Reductions" sheet for the January 1992 Monthly Operating Report to correct a typographical error. The affected portion of the sheet is appropriately noted.

If you require any additional information, please let me know.

Very truly yours,

J. L. Rainsberry
Plant Licensing Manager
