Attention: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Subject: **Docket Nos. 50-361 and 50-362**
Proposed Technical Specification Change No. NPF-10/15-354
San Onofre Nuclear Generating Station
Units 2 and 3.

This letter provides Amendment Application Nos. 117 and 101 to Facility Operating Licenses NPF-10 and NPF-15 for San Onofre Nuclear Generating Station Units 2 and 3, respectively. These Amendment Applications consist of Proposed Change Number (PCN) 354.

PCN-354 requests a change to Technical Specification (TS) 3/4.4.8, "Pressure/Temperature Limits-Reactor Coolant System," and their associated Bases, following NRC guidance provided in NRC Generic Letter 91-01. This generic letter allows licensees to remove their Reactor Vessel Material Surveillance Capsule Withdrawal Schedules from the Technical Specification because they are a duplication of the requirements of 10 CFR Part 50, Appendix H. SCE will maintain the reactor surveillance capsule withdrawal schedule in the Updated Final Safety Analysis Report as requested in GL 91-01. The PCN also corrects five typographical/editorial mistakes. These changes are strictly administrative in nature and include changing two page numbers.

If you have any questions regarding this amendment application, please let me know.

Very truly yours,

Enclosures
