Attention: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Subject: **Docket Nos. 50-361 and 50-362
Amendment Application Nos. 122 and 106
Change to the Technical Specifications Addressing the Radioactive
Effluent Release Report
San Onofre Nuclear Generating Station
Units 2 and 3.**

Enclosed are Amendment Application Nos. 122 and 106 to Facility Operating Licenses NPF-10 and NPF-15, respectively, for San Onofre Nuclear Generating Station Units 2 and 3. These Amendment Applications consist of Proposed Change Number (PCN) 419. PCN-419 requests a change to Technical Specification (TS) 6.9.1.8, "Semiannual Radioactive Effluent Release Report," TS 6.14, "Offsite Dose Calculation Manual," and TS Index, Section 6.9, "Reporting Requirements."

On October 1, 1992, 10 CFR 50.36a, "Technical specifications on effluents from nuclear power reactors," was amended to extend the Radioactive Effluent Release Report submittal frequency from semiannual to annual. Southern California Edison proposes to revise these Technical Specifications consistent with the new guidance in 10CFR50.36a.

If you have any questions regarding this amendment application, please let me know.

Sincerely,

Enclosures
