Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

SCE's letter of April 15, 1983 transmitted the Reactor Trip Breaker (RTB) report for San Onofre Units 2 and 3 which provided information on both the technical and programmatic aspects relative to the March 1 and 8, 1983 RTB surveillance failures.

Confirming our discussions of April 22, 1983 relative to the RTB report, SCE agrees to review the Post Trip Review Procedure for San Onofre Units 2 and 3 and advise the Staff within 45 days of any appropriate changes. The review will include the items addressed in Section III.B.7 of the Staff SER. Personnel performing the review will include the Nuclear Safety Group.

In addition, SCE will submit within 30 days following restart any changes deemed appropriate to the Technical Specifications regarding surveillance of the reactor trip breakers.

If you have any questions or comments, please let me know.

Very truly yours,

M. D. Medford for KPB
