Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

The Southern California Edison Company (SCE) formally submitted Proposed Change NPF-10/15-135, which concerns Toxic Gas Isolation System setpoints, to the Nuclear Regulatory Commission (NRC) by SCE letter dated April 6, 1984. Additional information pertaining to this proposed change was provided by SCE letter dated August 7, 1984. During an August 31, 1984 phone call, the NRC staff requested the submittal of the control room toxic gas concentration calculations which support Proposed Change NPF-10/15-135. The supporting calculations (Calculation Nos. N-4090-06, N-4190-18, N-4190-20, and N-4190-21) were provided informally on August 31, 1984 in response to this request. This letter constitutes the formal submittal of these calculations to facilitate NRC approval of Proposed Change NPF-10/15-135.

If you have any questions regarding the information provided by this letter, please call me.

Very truly yours,

M O Medford
