Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

References: (A) NRC to SCE letter dated June 14, 1984, Subject: Nuisance
Alarms in the Control Room

(B) SCE to NRC letter dated January 10, 1985, Subject: Detailed
Control Room Design Review (DCRDR)

The purpose of this letter is to respond to an NRC request for additional information (Reference A) relative to the disposition of the nuisance alarms at San Onofre Units 2 and 3. This NRC request for additional information was precipitated by SCE's Detailed Control Room Design Review Report which was transmitted to the NRC on January 31, 1984.

During an August 30, 1984 meeting with the NRC and documented by NRC to SCE letter dated October 23, 1984, the NRC staff indicated that SCE's DCRDR Report required additional documentation to verify that the requirements of Supplement 1 to NUREG-0737 and the guidelines of NUREG-0700 (Guidelines for CRDR's) had been satisfied.

Since the informational requirements regarding the nuisance alarms are related to the information being assembled for the DCRDR supplemental report, SCE's response to the NRC's request for additional nuisance alarm information will be provided as part of the DCRDR supplemental report which is currently scheduled for submittal by approximately May 31, 1985.

If you have any questions or comments, please contact me.

Very truly yours,
