Director, Office of Nuclear Reactor Regulation
Attention: Mr. George W. Knighton, Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Reference: SCE (M. O. Medford) to NRC (G. W. Knighton) letter dated May 8, 1985

Enclosures: A. State Historic Preservation Officer (Kathryn Gualtieri) to
SCE (M. O. Medford) letter dated June 12, 1985

B. SCE (Dr. David R. M. White) to California State University,
Fullerton, Anthropology Museum (Dr. C. Cameron) letter dated
July 1, 1985

By the referenced letter, SCE submitted to the NRC the final report on cultural resources affected by the San Onofre 230Kv transmission lines. Submittal of this report completed Section 4.2.1 ("Cultural Resources Data Recovery Program") of the San Onofre Nuclear Generating Station Units 2 and 3 Environmental Protection Plan. The Environmental Protection Plan is incorporated as Appendix B to Facility Operating License Nos. NPF-10 and NPF-15 for San Onofre Units 2 and 3, respectively. Subsequently, SCE received a request from the State Historic Preservation Officer (Enclosure A) to provide documentation of the curation arrangement for the cultural materials recovered during the Cultural Resources Data Recovery Program. Provided as Enclosure B to this letter is the documentation of the curation arrangement between SCE and California State University, Fullerton.

Please contact me if you have any questions concerning this matter.

Very truly yours,

M. O. Medford

Re: Cultural Resources Data Recovery Program, San Onofre 230kV
Transmission Line Rights-of-Way.

Dear Mr. Medford,

The Office of Historic Preservation (OHP) has reviewed the Research Proposal for a Cultural Resources Data Recovery Program for the 230kV Transmission Line Rights-of-Way From San Onofre Nuclear Generating Station To Black Star Canyon and Santiago Substation and to Encina and Mission Valley Substations, and the Cultural Resources Data Recovery Program for the 230kV Transmission Line Rights-of-Way From San Onofre Nuclear Generating Station To Black Star Canyon and Santiago Substation and to Encina and Mission Valley Substations, by Cultural Systems Research, Inc.

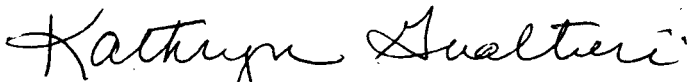

Based on the proposal and the final report, we concur that the project has had no adverse effect on National Register eligible properties. However, the report does not provide for the permanent curation of the cultural materials recovered during the project. OHP staff member Robert Jackson has discussed the curation problem with Southern California Edison representative Dr. David White, and we understand from this conversation that the collection, which is now in the possession of Southern California Edison, is planned for curation at California State University, Fullerton. Such an arrangement is acceptable to the OHP and we would appreciate documentation of the curation arrangement for our files.

Based on the data recovery report and an arrangement for curation, the OHP concurs that the site will incur no adverse effects based on data recovery. Please forward the proposal and data recovery report to the Advisory Council on Historic Preservation, if you have not already done so. Once the Advisory has reviewed and made a no adverse effect determination, responsibility to consider the effects on important cultural resources on this federally licensed undertaking will be terminated, pursuant to Section 106 of the National Historic

Preservation Act of 1966, as amended.

The OHP appreciates your consideration of cultural resources, and looks forward to receiving a copy of the final curation agreement. If you have any questions please contact Mr. Robert Jackson of our staff, at (916) 322-9602.

Sincerely,

A handwritten signature in cursive script, reading "Kathryn Gualtieri".

Dr. Constance Cameron
Anthropology Museum
California State University, Fullerton
Fullerton, CA 92634

Dear Dr. Cameron:

SUBJECT: Curation of Archaeological Resources from a Data
Recovery Program in Conjunction with the 230kV T/L
from San Onofre Nuclear Generating Station to Black
Star Canyon and Santiago Substation and to Encina and
Mission Valley Substations

Enclosed, with catalog lists, are the artifacts from the
subject data recovery program, which was conducted by Cultural
Systems Research, Inc. (CSRI), of Menlo Park, California, for
Southern California Edison Company. Per your telephone
conversation earlier this week with Mr. Cliff Sojourner of our
office, we are submitting the artifacts for permanent curation
by your institution.

It is my understanding that copies of the data recovery
report, written by Alex N. Kirkish and Lesley C. McCoy (1982),
have previously been transmitted to you by CSRI. I am enclosing
a copy of the site maps and study appendices which you may not
have on file. If there is any further documentation I can
provide, please let me know.

Our payment for curation services will be sent upon receipt
of your invoice. Please indicate by countersignature below

Dr. Constance Cameron
