

## DRAFT OUTLINE COMMENTS

Facility: STP

First Exam Date: September 26, 2013

| Written Exam Outline<br>(Date) |               |            |
|--------------------------------|---------------|------------|
| Comment                        |               | Resolution |
| 1                              | NRC Generated |            |
| 2                              |               |            |
| 3                              |               |            |
| 4                              |               |            |
| 5                              |               |            |

| Administrative JPM Outline<br>(Date) |  |                    |
|--------------------------------------|--|--------------------|
| Comment                              |  | Resolution         |
| 1                                    | SRO JPM 2 on RCS inventory very similar to Tech Spec evaluation in Scenario 3 during an RCS leak | Replaced SRO JPM 2 |
| 2                                    |  |                    |
| 3                                    |  |                    |
| 4                                    |  |                    |
| 5                                    |  |                    |

| Control Room / In-Plant System JPM Outline<br>(Date) |  |            |
|--|--|------------|
| Comment  |  | Resolution |
| 1  |  |            |
| 2  |  |            |
| 3  |  |            |
| 4  |  |            |
| 5  |  |            |

| Simulator Scenario Outline Comments<br>(Date) |   |   |
|---|---|---|
| Comment                                       |   | Resolution  |
| 1   | Scenario 5 has a steam generator level channel failure as a critical task | Revised scenario to include appropriate critical task evaluations |
| 2   |   |   |
| 3   |   |   |
| 4   |   |   |
