Attention: Mr. R. H. Engelken, Director

Gentlemen:

Subject: IE Bulletin Nos. 78-12, 78-12A and 78-12B
Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

References: A. Letters, SCE (K. P. Baskin) to USNRC (R. H. Engelken)
dated November 20, 1978, March 15, 1979 and May 16, 1979
B. Statements of Certification for San Onofre Units 2 and 3
(attached)

The referenced letters provided to the NRC a status of our efforts to provide the vessel weld material information required by the subject bulletins. The last of these letters stated that our reactor vessel manufacturer, Combustion Engineering (CE), would submit to the NRC a generic report (to include all vessels manufactured by CE) which provided the required vessel weld material information and provide SCE with a certification that San Onofre Units 2 and 3 was included in that report. Additionally, following submittal of that report, SCE would inform you of our receipt of the above mentioned certification. Accordingly, we have received those certifications (attached) and are satisfied that the generic report adequately represents data for the San Onofre Units 2 and 3 reactor vessels.

Should you have any questions or require further clarification, please contact me.

Very truly yours,

K P Baskin
