Subject: RE: Belgians are cautiously positive on Doel 3 and Tihange 2

I thought they had determined that all the laminations were acceptable to the edition of Section III the vessels were made to

Thanks,
Dave Harmon

FYI - The English version of the FANC press release regarding Doel 3 is attached. Bottom line: At this very moment, the FANC sees no elements that would have to lead to a permanent shutdown of the nuclear power plants.

At our call this afternoon, the MRP (Materials Reliability Program) informed us that they are still in the process of collecting data from U.S. plants and should have the results available before our public meeting on March 5.
