I understand. However Jeff suggested that said meeting has NOT been noticed, I checked the website and confirmed Jeff's belief ... see below.

While we have planned to have a meeting we are not yet committed to do so ... the decision has not yet been fully made.

My point is that should we at this time think that the most efficacious course of action is to defer the meeting we can do so with little impact or inconvenience.

12/27/12 01:30PM	Meeting notice and agenda Staffs of the AP1000 design center COL applicants will discuss, ask questions, or note any concerns with COL application review issues. [more...] Participation: Category 2	NRC Two White Flint North 11WPN-10 C01 11545 Rockville Pike Rockville MD	Jerry Hefle (301) 415- 8148

Decision's been made. Doesn't preclude another public meeting afterward. We will support NRR's public meeting on January 8th. Industry is onboard with this date too and there is more to this meeting than just a technical exchange. That can be done later.

Since Jeff has mentioned this, I will say it again ...

I think our meeting with our licensees would be much more meaningful if we are able to talk openly about the situation in Belgium, and the Belgian analysis thereof. As we are all aware there is much technical

documentation and assessment being performed in Belgium all of which (in my opinion) is of an extremely high technical quality. But on 8 January virtually none of that information will be in the public domain, so the level of the conversation we can have with our licensees will be limited to the information which is publically available ... which is sparse and absent in any details.

Because of this I think it is better to defer our public meeting. This will enable NRC staff (if funds are available) to attend the meetings in Belgium and get the latest information. A delay will also enable the FANC to make their documents public. Once the FANC documents are public we can then (in my opinion) have meaningful and substantive discussions with our licensees.

When I was in Belgium last week Mr. DeRoovere re-stated his commitment to have documents publically available by the end of January 2013.

Also January 8th is the same day we had tentatively identified for the Doel 3 public meeting. Maybe it hasn't been noticed yet and the date can be changed to a week or two later.

Note that, under Item 2) below, another set of Working Group meetings in Brussels is requested on 1/8-9. I assume, based on the previous discussions, that RES will not support Carol's and my attendance at that meeting.

Let me know if that has changed.
