Dear Andre,

It was a pleasure seeing you last week. The meetings were very interesting and, though my interests are focused on the NDE aspects of the problem, I found it to be especially helpful to hear the concerns and conclusions of the other working groups and expert panels.

I am writing today to follow up on a request made back in October. I understand that the licensee recently provided you with the spreadsheet containing information on all of the Doel indications, but that the information was restricted in distribution. As you can see from the message below, there is still interest on the part of our structural analysis experts in obtaining that data. Is there any possibility that you can provide the information to us? If not, do you have any suggestions on what we could do to obtain this information?

Lastly, I am very interested in the NDE related reports that you received early last week. Will they be provided to the Working Group members?

Thanks very much!

Best regards,
Carol

Carol:

During the October 16th meeting in Belgium, I asked if the spreadsheet (or similar) containing all of the Doel indications that were evaluated could be supplied to WG3 members. The response from Guy Roussel at the time was "yes," but that this request would need to go to WG1. I have not seen such a spreadsheet to-date.

Does WG1 have such a spreadsheet and can I get a copy?

Thanks,
Gary L. Stevens
