FOIA/PA REQUEST

Case No.: 2014-0044
Date Rec'd: 11/18/13
Specialist: So
Related Case:

Dear Raphael, Mary Jean.

Good evening.

Now, I am asking another FOIA requests. Records I am seeking are

(1) All the records USNRC had made or obtained until November 16, 2013, which mentions about the fact that one fourth of fuel rods in Fukushima Daiichi Nuclear Power Plant unit 1's SFP are damaged before March 11, 2011.

(2) All the NRC Power Point files on Fukushima Crisis made between March 11, 2011 to November 16, 2013 in eastern time, which are decided 'NO' to entered on "STARS" TRACKING SYSTEM.

I am asking fee waiver and priority rapid proceeding, and special consideration on broad disclosure even if they are applicable exemption, in following reasons.

(1) Fukushima Daiichi crisis case's ruling in Tokyo district court, which are decided to be done in December 12 may need to suspend if newly obtained documents are crucial in this case. Also, even if I can not get relevant records until November 12, the appeal to Tokyo high court (which must be done by me or Japanese government regardless to which wins in Tokyo district court), the evidence both side has to submit to Tokyo high court's dead line is going to be next January.

This case is very influential to the nuclear policy in both Japan and whole world.

(2) Now, I have my own news media <http://echo-news.net> and English page <http://echo-news.net/en>. As a media, we can contribute to public interest.

The response about 6000 or so pages to 2012-172, I got your stuff via airmail last few days are... quite informative.
Thank you again.

Best.

Takanori Eto
