Subject: Termination of License Instead of Renewal Discussion

Discussion: I recommended to the Army that they transfer the Special Nuclear Material to their Byproduct Material License. They had submitted a renewal request to store special nuclear material until it is disposed. As the areas used by special nuclear material co-exist with byproduct material, decommissioning was not feasible and they did not expect to obtain special nuclear materials in the future. They had reviewed this item and stated that they planned on submitting for termination of this license and amendment of their byproduct license to add the special nuclear material after it is discussed with their Radiation Safety Committee. They plan on submitting the amendment information in January 2014.

Action Required: Army will submit amendment and termination information in January 2014.
