Director, Office of Nuclear Reactor Regulation  
Attention: Mr. Frank Miraglia, Branch Chief  
Licensing Branch No. 3  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station  
Units 2 and 3

On November 18, 1981, SCE transmitted to the NRC a report concerning a small earthquake swarm which occurred on November 10, 1981 and was located offshore from Oceanside. Seven copies (NRC Mail Code B024) of a supplementary report on this subject are provided as an enclosure to this letter. As indicated in this report and the previous report, these events are consistent with historic earthquake data in the region of the San Onofre site.

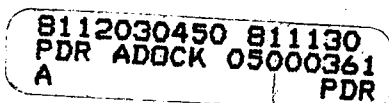

By letter dated October 8, 1981, Mr. D. W. Phifer identified several areas of geologic interest to him in the San Onofre region. Seven copies (NRC Mail Code B025) of a report entitled "Report On The 'Aliso Canyon Fault' and the Alleged 'Mountain Top Fault Zone', Camp Pendleton, California" are provided as an enclosure to this letter. As indicated in the report, none of the features discussed in Mr. Phifer's October 8, 1981 letter are of significance to the San Onofre site.

If you have any questions or comments concerning either of these reports, please contact me.

Very truly yours,

*K P Baskin*
