Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2&3

The purpose of this letter is to describe the licensed staffing levels which Southern California Edison Company will employ for the period during which both San Onofre Unit 2 and Unit 3 are in startup.

In a meeting with Southern California Edison Company on September 20, 1982, the NRC staff identified that minimum shift manning for licensed operators currently imposed on operating reactor facilities was intended to be used for plants that were in firm operation and that the operation of both San Onofre Units 2&3 in a startup phase would require augmented licensed operator manning. Accordingly, licensed shift manning during the period between initial criticality of Unit 3 and one month after initial attainment of 100% power on Unit 2 will be as follows:

1. There will be four Reactor Operators with two assigned to each plant and,
2. There will be three Senior Reactor Operators with one assigned to each plant and the third responsible for both units.

The following process will be used to control rotation of operators between the two units:

1. Normal assignments will be to a given shift for a given unit for a duration of at least one shift week (six or seven days),
2. Overtime assignments will be made preferentially to the unit to which the individual is currently assigned and

P PDR

3. In the event that the overtime assignment must be to a unit different from the current assignment, the individual will receive special shift relief instruction (review of the previous 48 hour shift turnover documents and a one hour overlap with off-going operator).

During the periods (1) prior to initial criticality for Unit 3 and (2) after completion of the Unit 2 startup test program as defined above licensed shift manning will be in accordance with the license.

If there are any questions, please contact me.

Very truly yours,

Robert Ditch
