## General Comment

I am currently a reactor operator at San Onofre Nuclear Power Plant, docket # 50-361 and 50-362. It is my desire to see nuclear plants built that can burn the SNF ridding ourselves of a burden AND producing electricity at the same time. It is time for a reassessment of the prohibition on reprocessing; I do not share the fear of proliferation that President Carter had. In the mean time, I support opening Yucca Mt. if only to relieve currently operating nuclear plants of their need for more space for their SNF. I am quite sick of the anti-nuke, tin-foil hat club interfering with policy, frightening the public in their disinformation campaigns, and providing no rational alternative to the decisions made by the industry nor the NRC. They worked to prevent Yucca Mt. from opening and now at SONGs, these air heads are demanding we get rid of the SNF ASAP. The fools don't seem to recognize any inconsistency in these activities. I do hope the NRC will pay them the attention their ideas merit, i.e., none, and round file any correspondence from these knuckleheads.
