## General Comment

I have no confidence in the NRC's waste confidence Draft Generic Environmental Impact Statement. it should be removed for thorough revision. Since we have no disposal facilities in operation, we need to stop creating spent-fuel/high-level radioactive waste! No new reactor licenses should be issued until there is an operating facility to permanently house deep-geological high-level radioactive waste. The key word is PERMANENT. No "interim" storage facilities should be implemented. PERIOD.
