Dear Sir,

From the beginning of the atomic age in 1945, EVERYONE eats, drinks and breathes invisible, deadly radioactive fallout. Most disease rates then increased. All we can do now is minimize exposure to radiation. Conduct a proper test to find the most cost effective method. It was clear to me that the late Dr. Radha Roy, professor of physics emeritus, invented the best method that will eliminate....(not reprocess or bury nuclear waste which does not eliminate the radiation health threat).

THE ROY PROCESS FOR THE TRANSMUTATION AND NEUTRALIZATION OF RADIO  
ACTIVE WASTE

There is a viable, cost effective alternative to the federal policy of burying nuclear waste. First, there must be a Congressional Bill passed to allow transmutation, or backwards engineering nuclear waste to a non-radioactive element. In addition to eliminating nuclear waste, the decay heat can turn the steam electric generators at each nuclear power plant to produce electricity.
