Subject: Spent fuel pool NRC Commissioners" Public Meeting January 6,2014.
Date: Monday, December 16, 2013 12:11:35 PM

Dear Commissioners and Secretary,

I respectfully submit a request for an extension of the comment period on NUREG 2157 and associated rulemaking actions. I recently found a notice that states the Commission will meet on January 6, 2014, to discuss and be briefed on Spent Fuel Pool Safety and Expedited Transfer. Closing the comment period before the Commission is presented the staff's finding and conclusions is a very limited approach. The Commission may offer a solution that makes the Nureg mute or provides findings that have little to do with the NUREG.

At a minimum, the comment period needs to be extended past the January 6 Commissioners' Meeting.

Respectfully submitted,

Marvin Lewis
