General Comment

I am horrified and terrified by the lack of oversight and omissions of the Nuclear industry of contamination of our air, land and waters of nuclear releases and 'leaks'-'controlled' and otherwise. Furthermore, I am extremely concerned about the nuclear waste produced with no viable storage solution. Earth is no place for any nuclear product. Our world has been pillaged and plundered enough! Nuclear is not clean when its byproducts last for many thousands of years and truly never disappears. The risk to humanity is too great and Fukushima is proving that as it destroys the Pacific Ocean and Japan and will kill many more across the globe from its fallout. Why is there no advice or even mention of this ongoing nuclear catastrophe?? All nuclear must end for the sake of our children and theirs and so on who will inherit this disgusting legacy! This includes yours! Nuclear is not cost effective and regardless, be damn the cost. it is time to embrace renewable energy and decommission every nuke reactor in the WORLD.
