Name: Mary Titus

General Comment

The NRC must insist all domestic nuclear waste gets put into dry cask storage immediately. For-profit utilities must bear this cost and not fob it off on customers as they bought into unsafe nuclear power knowing there was no practical way of handling the waste.

The Dept. of Justice needs to examine illegal nuclear waste handling over the decades and prosecute regulators who were negligent. The US needs to really ban burning nuclear waste instead of just pretending to.

Stop, immediately, manufacturing toxic D.U.. Label all consumer and industrial products containing D.U. and do a recall on all of them.

The NRC needs to stop telling the public runaway nuclear plant melt-down pollution is harmless. It is a bold faced lie.
