Subject: NRC Waste Confidence

To whom it may concern,

Since I cannot attend the public meeting regarding storage of nuclear waste at our local nuclear power plant, Diablo Canyon in San Luis Obispo County, California, I would like to submit my support of on site waste storage until a future alternative is found. I do not feel this is a threat to our community and support the operation of the Diablo Canyon Nuclear Power Plant. I am grateful we have a source of energy that supplies so much electricity locally with such a low environmental impact. It is my wish however that we invest more into research and development and eventually find a permanent solution to the nuclear waste issue rather than have on-site storage. I, and many others I know, would support construction of new nuclear power plants here in California, especially reactors that do not generate waste in their fuel cycle. I do hope that the opposition and political climate regarding the issue of waste storage and the use of nuclear power plants will subside in time, especially with future implementation of newer, cleaner reactors.

All the best,
Michelle Kaul
