**Subject:** Comment for NRC-2012-0246

As Co-coordinator for Michigan Stop The Nuclear Bombs Campaign for 12 years I represented MISTNBC at the December 2nd Public comment period of "Waste Confidence Draft Generic EIS" in Perrysburg, OH. I have been a committed anti-nuclear weapons activists for over 31 years and only recently have included anti-nuclear power activities. I understand many connections between nuclear weapons and nuclear power plans and none of them are good or healthy.

I did not speak up as I thought the main points spoken about in opposition to plans for Fermi-3 were covered and I endorse all of them.

I emphasis my support for what Vic Macks wrote in the Fall issue of Peace Action of Michigan's newsletter, FLASH on page 8: "Monroe County, MI: During the period 1979 to 1988, Monroe had 21.2% fewer cancer deaths than the U.S. as a whole. During the period 1989 to 2005, correlating with Fermi 2 being online, Monroe had 45.5% higher cancer deaths than the U.S. as a whole. This is reported in a study by The Radiation and Public Health Project which utilized Center for Disease Control statistics."

Do NOT build Fermi-3 as it would be too dangerous for human health, our environment (especially Lake Erie) and animals. No nuclear power plant should be operating another day until the highly toxic waste can be dealt with truly safely for the rest of time.
