General Comment

No fukishima's in southern california! We DO NOT want the nuclear waste of san onofre stored on site! It is the worst possible place to store radiation. On a fault line and at the oceans edge. You are public servants & need to put the publics safety first. Costs to industry pale in comparison to costs of a nuclear accident in the backyard of 8 million people. I don't care if the industry goes bankrupt. Though this would be an economic crisis it pales in comparison to the humanitarian crisis that would rest on your shoulders! Have some guts!
