Secretary  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001  
ATTN: Rulemakings and Adjudications Staff  
301-415-1101, citing Docket ID No. NRC-2012-024

Dear Secretary:

The California Central Coast Marine Sanctuary Alliance represents many who live and work in San Luis Obispo County, near PG & E's Diablo Canyon Nuclear Power Plant and 13 earthquake faults. Our lives and livelihoods depend on the safe regulation of this nuclear power plant and Nuclear Waste Storage Site, responsibilities of the NRC.

We urge the NRC to order PG&E to transfer the radioactive wastes into dry casks storage on an accelerated schedule, rather than leaving the rods in densely packed spent fuel pools.

**We are concerned for our safety due to the lack of responsible decisions by the NRC.**

\*The report from the Union of Concerned Scientists ("Seismic Shift") states the lack of enforcement by the NRC of the Safe Shutdown Earthquake requirement found in Diablo Canyon's license.

As the Union of Concerned Scientists report points out, of the 100 reactors currently operating in the U.S., the two at Diablo Canyon top the NRC's list as being most likely to experience an earthquake larger than they are designed to withstand.

Thank you for your efforts to protect the residents of the state of California.

Sincerely,  
Carol Georgi  
Coordinator, California Central Coast Marine Sanctuary Alliance
