General Comment

When SONGS was originally put into service (circa 1965), what was then the Atomic Energy Commission asserted that all nuclear waste would be removed within 30 years (circa 1995) and the contour of the land would be restored to its natural condition.

In 2013, we have a what appears to be a permanent nuclear waste dump in San Onofre.

You believe the representations of the US Government have any credibility at all?

Remove the waste--as promised!
