nixmox@comcast.net

The existence of nuclear power generation plants and their nuclear weapons and all of their deadly associated waste must be pulled out of production. All nuclear power plants in these United States according to former NRC Chairman, Gregory Jaczko should be closed and DE-commissioned. The agency of the Nuclear Regulatory Commission under the U.S. Constitutional dictates of it's administrative law responsibilities have failed in their responsibilities to protect the Inalienable Rights of Citizens of these United States. The NRC and this "Waste Confidence Hearing Process" is a sham publicity stunt ". Their are hundreds, if not thousand of studies done on the issues of nuclear waste from the nuclear fuel cycle processes. And billions of dollars already spent on the nuclear waste problem and no remediation in sight for this (at a minimum) 200,000 year problem. The Nuclear Regulatory Commission must be replace with a truly transparent body and not a "revolving door of inside lobbyist from the" Nuclear Energy Institute" and their "associated industries". This is a world wide issue... Only a world wide collaboration through a fair and just political economy will re-mediate the nuclear waste problem . The Nuclear Regulatory Commission and Its" "current mindset" must be decommissioned .

Bernard August
