Docket: NRC-2012-0246

Consideration of Environmental Impacts on Temporary Storage of Spent Fuel After Cessation of Reactor Operation

Comment On: NRC-2012-0246-0456

Waste Confidence - Continued Storage of Spent Nuclear Fuel; Extension of Comment Period

Document: NRC-2012-0246-DRAFT-1152

Comment on FR Doc # 2013-26726

Submitter Information

Name: Dmitry Resnyanky

General Comment

I'm not a nuclear decommission expert by far, and even I can see what's right in front of me. The disastrous handling of decommissioning the Fukushima nuclear plant, the discharge of contaminated water into the waters surrounding the plant and into the Pacific, as well as the extraction of spent nuclear fuel has gone long enough. There are other solutions that need to be urgently looked at and implemented without hesitation or interference on behalf of interested third parties and bureaucratic bodies

As I've said before, I am not an expert, however there is a man who quite clearly is a certifiable expert in the field of nuclear plant decommission. Arnie Gundersen of Fairewinds Energy Education, a non-profit organization aimed at educating people like me and the thousands of people like me who know little about the process of dealing with disasters such as the one at Fukushima, has demonstrated his wealth of knowledge on the subject, has shared this knowledge with the world, and has offered constructive, effective solutions time and time again.

I implore you to listen to this man, his colleagues, and others like them, before it becomes too late to do anything at the site of the Fukushima meltdowns. Mr. Gundersen's website can be viewed at the following address:

<http://fairewinds.org/>

Thank you for taking the time to read my thoughts and I wish for everyone involved in the clean-up and decommissioning of the Fukushima Nuclear Plant a quick and healthy success.
