**Docket:** NRC-2012-0246

Consideration of Environmental Impacts on Temporary Storage of Spent Fuel After Cessation of Reactor Operation

**Comment On:** NRC-2012-0246-0456

Waste Confidence - Continued Storage of Spent Nuclear Fuel; Extension of Comment Period

**Document:** NRC-2012-0246-DRAFT-1137

Comment on FR Doc # 2013-26726

## Submitter Information

**Name:** Susan Freeman

## General Comment

I reject NRC's waste confidence Draft Generic Environmental Impact Statement (DGEIS), and ask NRC to withdraw it for thorough revision. I have NO confidence in NRC's "waste con-fidence"!

I believe that no industry should be allowed to continue creating wastes it has no ability to dispose of. Since neither the nuclear industry nor the Federal Government has an operating spent-fuel/high-level radioactive waste

disposal facility in operation, it should not be allowed to manufacture any more of these wastes. The first Rule of

Holes is: when you find yourself in the bottom of a hole, STOP DIGGING! If you have no place to dispose of radioactive spent fuel, STOP MAKING IT!

I believe NRC should not be allowed to issue new reactor licenses, nor grant license extensions to old operating reactors

until a permanent, deep-geological high-level radioactive waste disposal facility is built and operating.

No state is a waste dump! We don't want any more high-level radioactive wastes coming "to or through" our state. I do not want to see more high-level, long-lived radioactive waste coming to proposed so-called "centralized interim storage" waste facilities (a.k.a., "parking lot dumps") here or anywhere else.

I want to feel confident and comfortable encouraging my children to have children. I want to believe our voices will be heard. I want to believe those making these laws are awake enough to make proper decisions. I want to believe we have acknowledged how much damage we have already done to the human race and life as we've known it, and that we will stop the madness.
