Docket: NRC-2012-0246

Consideration of Environmental Impacts on Temporary Storage of Spent Fuel After Cessation of Reactor Operation

Comment On: NRC-2012-0246-0456

Waste Confidence - Continued Storage of Spent Nuclear Fuel; Extension of Comment Period

Document: NRC-2012-0246-DRAFT-1187

Comment on FR Doc # 2013-26726

Submitter Information

Name: Lisa Zure

General Comment

I absolutely reject NRC's waste confidence Draft Generic Environmental Impact Statement (DGEIS) and demand that you withdraw it for thorough revision. Based on the horrifying reality of nuclear waste and its toxic potential for thousands of years, I have NO confidence in NRC's waste confidence. The reality is, there is no reason on earth to continue with a "technology" that threatens life itself; the definition of "technology" should be "tools, created by humans to make their lives more livable." In reality, the nuclear "industry" and nuclear "technology" is destroying life. This is not a helpful industry, this is destructive industry based on false science.

I firmly believe that no industry should be allowed to continue creating wastes it has no ability to dispose of. In fact, I do not believe in any industry that creates more toxic waste. As stated before, this is destructive industry based on false (or incomplete) science. The truth is, neither the nuclear industry nor the Federal Government has an operating spent-fuel/high-level radioactive waste disposal facility in operation. Further, there is no "safe" method for disposing of nuclear waste. Therefore, it should not be allowed to manufacture any more of these wastes.

NRC should not be allowed to issue new reactor licenses, nor grant license extensions to old operating reactors ever.

No state is a waste dump! We don't want any more high-level radioactive wastes coming "to or through" our state. The entire approach to nuclear waste endangers public and environmental health; the idea of transporting high-level, long-lived radioactive waste coming to proposed so-called "centralize interim storage" waste facilities ("parking lot dumps") is unsound.

As a U.S. citizen, mother and professional, I am appalled that my government is involved in such a dangerous, unmanageable and out-of-control industry. Nuclear was a bad idea from the start, and now the waste problem will haunt us for generations. We can do better.
