General Comment

The conflicted NRC has become a lackey of the industry it is supposed to regulate. Nuclear power only exists as a spinoff from

the bomb makers, bombs being a product the world is trying to get rid of and cannot live with. So, the NRC is putting short term profits and long term extinction before the health of 7.2 billion people including their own families! What does that say about priorities?

Nearly 40% of new energy now comes from clean, cheaper, more quickly deployed and safe, decentralized renewables. Nukes

are soon to be history as that cannot compete even if they were non-lethal, which they aren't. The market, common sense and morality all rage against the monster that is the split atom.

Do your job: stop nukes now, no more wastes which have contaminated the world forever, no more terrorist threats of

instant death by bullies like the US who want the world NOW, against all reason and sanity.
