## General Comment

Enough Already ! Shut them down !!

Look What's happening in Japan and to the Pacific Ocean and will be all of them !

Those were 2 Spent Fuel pools that burned and exploded !

The only thing that's going to fix the Fukushima's disaster is a Time Machine !

3 cores in full meltdown.

300 tons or more of highly radioactive water running into the sea.

These spent rods have to be looked after for thousands of years !!!!!

Putting more and more on the heads of the unborn to deal with !!!
