General Comment

I'm a resident of Southern California; I urge you to responsibly, safely and as quickly as possible remove, and safely store long term the radioactive waste from the decommissioned San Onofre Nuclear Generating Station. Its location on a earthquake fault and at risk of Tsunami, - and with US Marines practicing day and night in the area at Camp Pendleton! - makes it absolutely too vulnerable, dangerous and too risky for millions of residents and future generations. I won't stop monitoring and voicing my concerns until it will be done. I haven't used my time and energy to pressure the decommissioning of the nuclear power plant in the past 2 years to allow nuclear waste to remain here and haunt us and our children.

Thank you for your prompt attention to this matter

Sincerely,

Alessandra Colfi
