FAX TRANSMISSION  
301-415-1101**Friday, December 20, 2013****Secretary  
U.S. Nuclear Regulatory Commission  
301/415-1101 Docket ID No. NRC-2012-0246****Subject : DGEIS/ Solicited Public Input & Involvement**

Vista 360 thanks the U.S. Nuclear Regulatory Commission for its efforts in addressing the Waste Confidence issue and carrying out the long standing practice of conducting your regulatory, licensing and oversight activities in an open manner.

Informing the public and taking its unvarnished perspective into account should be an institutional imperative of the highest order and providing opportunities for participation in a defined process and your decision making process is a laudable goal and objective.

Since the onset of the U.S. Nuclear Regulatory Commission's initiative to address the Waste Confidence issue in the context of the draft generic environmental impact statement (DGEIS), Vista 360 has participated in the numerous webcasts, teleconferences and scheduled regional public meetings on the waste confidence issue and the DGEIS initiative. We thank you for the opportunity to engage the process and participate. Now the hard work of review, consideration and hopefully incorporation begins.

After deliberations are concluded, we challenge the U.S. Nuclear Regulatory Commission and the DGEIS professional staff to outline to the public ( by methodology) the means by which solicited comments were organized for consideration and review, then how the solicited public comments were correlated by applicability and then incorporated by reference into the final work product of the Waste Confidence Environmental Impact Statement.

Respectively, this disclosure effort should be conducted and carried out by the dictates of the **Government Performance Results Act of 1993** and in the spirit of openness as purported by the U.S. Nuclear Regulatory Commission in its stated policies. Thank you

Thomas P. Rielly  
Executive Principal
