Comment:

It is ludicrous. It is insanity. It is insulting to listen to you, the NRC, bulldoze forward with your lies and false assumptions that there will be a safe place to store the radioactive mess you have created and are not taking responsibility for. Diablo Canyon nuclear power plant must stop producing waste immediately.

While we wait and watch the global disaster at Fukushima, follow the currents of the great Pacific Ocean carrying radioactive waste to distant shores, destroying everything in its path, you act as if it is "business as usual." Why would you do anything less than humanly possible to secure the spent fuel rods into dry cask storage as soon as possible at Diablo Canyon nuclear power plant? It is your job, your responsibility.

We have lost all confidence that you have our best interest in mind. We have lost confidence that you will ever do the right thing. Prove us wrong.

It is time to shift your focus toward safe, renewable energy. It is time to close Diablo Canyon because there is no safe storage on a multiple, active earthquake fault.

I support the Washington DC court of Appeals for speaking the truth, I support the moratorium on licensing and re-licensing of all nuclear power plants in the United States.

you have no right to create this burden for our
future generations. You have no right to threaten our
health and safety and the health and safety of the
Pacific Ocean. Stop producing waste immediately. Get
the spent fuel rods out of the pools and into dry casks.
