Re: NRC's Spent Fuel Storage

Dear Secretary,

I am writing to support the NRC's Spent Fuel Storage Rule, and wish to say that with NRC oversight PG&E has a very particular and successful spent fuel management program. PG&E continues to safely store fuel via both its wet and dry cask storage systems.

I am confident that regulations of safeguards are in place to effectively manage and monitor the stored spent fuel. However, the Department of Energy has a responsibility to make good on its commitment to receive and safely store the spent fuel for the long term. By doing so, locally stored spent fuel could be safely removed to a single or regional location controlled and protected by our national government.

Thanking you in advance for your consideration,

Celine Souza
