SUBJECT

Discussion of supplemental information for November 17, 2013 GEH Request for Special Authorization to Use the Model No. 2000 Package

SUMMARY

NRC Participants: Ricardo Torres, Veronica Wilson, Rob Temps, Meraj Rahimi, Eric Benner, Michele Sampson, John Vera.

GEH Participants: Tim Christman, Jerry Head, Kendall McGowan, Tom Caine, Kate Martin, Bryce MacDonald, Carlos Martinez, Don Krause, Jim Clark, Juswald Vedovi, Chris Ware, Scott Murray.

The teleconference was conducted to discuss concerns NRC staff had regarding the results of a recent inspection and the effects on the request for special authorization. NRC stated that in order to demonstrate reasonable assurance of public health and safety, GEH would have to furnish information demonstrating that the package components under question would not affect package performance during normal transport or hypothetical accident conditions. Some options discussed were structural and/or shielding analyses. GEH opted to rely on previous shielding analyses, but providing additional shoring so that the sources cannot geometrically be displaced from the shielding and demonstrating this by analysis. GEH stated they would provide the information as a supplement during the week of December 23rd, 2013. NRC stated the information would be reviewed, and any concerns communicated promptly.
