SUBJECT: DEFENSE LOGISTICS AGENCY, NOTIFICATION OF NO PRINCIPAL
ACTIVITIES BEING CONDUCTED UNDER NRC LICENSE STC-133, CONTROL
NO. 582327

Dear Mr. Porter:

This is in reference to your letter of notification dated October 17, 2013 indicating to NRC that you have had no principal activities under your Nuclear Regulatory Commission License No. STC-133 for a period of 24 months. 10 CFR 40.42 (d) requires certain actions for you to take including the start of decommissioning of areas that contain residual contamination or submission of a decommissioning plan if required within 12 months of this notification. NUREG-1757, Vol. 1 and Vol. 2 located at our NRC website maybe helpful to you in your planning.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue to follow your progress. If you have any technical questions regarding this matter, please call me at (610) 337-5303.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Thank you.

G. Porter
