RE: Materials License 31-23847-01E

Subject: Request for license termination

Dear Sir/Madam,

Richemont requests termination of the referenced Radioactive Materials License.

The licensed radioactive materials were associated with time piece hands and dials manufactured outside the USA by Richemont companies and imported for distribution within the US. Richemont companies have not utilized Tritium in the manufacture of complete timepieces or timepiece components for more than 3 years. We have, however maintained our license for that time period to allow for remaining product to move fully through our supply chain to the consumer. We have audited the remaining stock and have concluded that we no longer maintain Tritium type products in stock.

Additionally, because of the extreme low radiation levels associated with Tritium in the hands and dials of timepieces we do not believe it is necessary to survey the property for decommissioning. However, if the Commission believes such a survey is required please advise.

I will await your confirmation of termination.

Best regards,

Gene Rodgers
