General Comment

What you are doing is so very wrong; no ifs ands or buts about it.

Not safe & you can't make it safe no matter how many planes your fly into your cement casks; remember 9/11.

Not safe now ask people who are poisoned in communities by the nuclear power plants that were almost hit by recent tornados in Illinois, employees who worked at Olin & employees dying from cancer now from working at nuclear facilities.

UPS & Fed X tracks better than you do for radioactive materials be it medical or otherwise.

You are liars who say its public comments & nothing about this fiasco & or NRC "ideas" to date have been made public.

You are proverbial serial killers giving out more licenses to spill & kill.

Next time you host a meeting try to make sure your microphones work; you blame the hotel but you are the ones ultimately responsible & responsibility is not something you are found to be credible or able to do.

Also it would help if you weren't discussing having drinks together with industry reps after the hearing in front

of everyone there; or sit with industry folks & stop staging the events with the public vs. paid industry personnel. SERIOUSLY!!!! You used the same person at the last hearing to follow my comments & you made it impossible for people who were signed up to speak at all on purpose.

How do I know, I know when they signed up & you refused to let them speak by making them wait all night until they were forced to leave due to the long drive home & jobs they have in the morning.

You are an insult to what you are supposed to stand for & insulting the intelligence of everyone this will harm. I offend you (?) You offend everyone all of us/US & everything environmental without regret.

For every child & person suffering or worse in nuclear/radioactive neighborhoods etc. their blood is on your hands. Stop wasting lives; our time & all our futures if my tax dollars are your salary & industry welfare we the people demand a refund.

Happy Holidays to you & yours while many US citizens are drinking contaminated radioactive water because you're doing such a good j o b.

Happy new year to you & yours while so many in nuclear neighborhoods & mined areas for the "yellow cake" are nurisng their children suffering radiation overdoses, teeth seperation in children, cancers in homes at epic proportions including their pets all while losing their finnacial futures to pay all the medical & funeral bills.

Yes, Happiest Wishes to you & hope you get yourstoo; until you stop adding insult to injury, nobody is safe or immune.
