General Comment

Dear Members of the NRC,

Thank you for extending the comment period on the proposed Waste Confidence Rule - Continued Storage of Spent Nuclear Fuel. As a resident of San Luis Obispo County living near the Diablo Canyon Nuclear Power Plant, I am opposed to continuing to generate more spent nuclear fuel for which there is no known safe storage.

Spent nuclear fuel will be hazardous for thousands of years to come, and I feel it is morally and ethically wrong to continue generating this waste with which our current and future generations will be burdened, both environmentally and financially, long after the energy is used. It is morally and ethically wrong for the utility company to continue making profits now which our future generations will be paying for, for years to come.

Please do not renew the license for Diablo Canyon, or any other nuclear power plant. You have the moral responsibility now to shut down these plants and take care of our children who will inherit, and have to deal with, this mess.

Respectfully submitted,

Julie Gibson
