## General Comment

Most Americans have not been privy to the facts about Nuclear power plants and the horrific permanent waste they create. My family and I are disgusted with the lax way the NRC operates and how it is basically run by the Nuclear industry. The threat of disaster is real and it is plain stupidity to continue the way we have for decades leaving so much to chance.

It's time some changes were made. The public safety should be the utmost concern of the NRC. It is not. Most Americans have no clue what is happening with nuclear and nuclear storage. If they did they'd be very upset. Business as usual, they are not informed of the truth about nuclear intentionally. This is unfair and devious. Too many things are forced on the public without their knowing for the sake of the all mighty dollar and we're paying for it!

We'd like to see the complete decommissioning of all nuclear power plants. Further we strongly oppose the storage of nuclear waste at San Onofre, California. We don't want that crap stored here! They've already proven they can't be trusted.

My personal attitude about Nuclear is that it is the most evil thing ever! It is not safe and it never will be safe! Millions will die and soon because of Fukushima. Hundreds of thousands of children will develop thyroid cancers.

Enough already. It's time America woke up and set some examples. We are so behind in so many things. There's nuclear waste all over the planet. It's a mess! Years of irresponsible regulation that is worthless! Shameful!

Stop procrastinating and start protecting public safety! No more excuses!
