General Comment

I oppose any plan for transportation and/or "temporary storage" of existing nuclear waste.

We do not at this time have -- or reasonably foresee -- any technology to make transport or storage safe.

We do know that moving nuclear waste through an area, and siting it in an area, will inflict life-destroying damage that is for all intents and purposes permanent.

Until this changes, we cannot responsibly license the production of any new nuclear waste. And we cannot responsibly move what we have created.

Any other policy is irresponsible, criminally dishonest and savagely cruel.
