General Comment

As I recall, 104 of "our" nuclear power plants are inherently unsafe and, aside from shutting them down, the problems which afflict them, and by extension us, cannot be remedied.

The decommissioned San Onofre generating station is but one of many such facilities in the U.S. Even if each and every unsafe reactor were to be decommissioned, we'd still be left with the problem of nuclear waste, an extreme hazard in and of itself.

For that reason, which seems sufficient, I want to be assured by your Office that the nuclear waste problem isn't allowed to percolate and sit like a time bomb waiting to go off.
